EDUCATION

B.Tech Computer Science and Technology ***2014 – 2018 (Expected)***
- Vellore Institute of Technology — CGPA – 9.18 / 10.00

Class XII, CBSE **2012 – 2013**
- Montfort Senior Secondary School — Percentage = 90.80%

Class X, CBSE **2010 – 2011**
- Montfort Senior Secondary School — CGPA – 10.00/10.00

EXPERIENCE

Gethu Games Chennai, India
Junior Developer *December 2016 – January 2017*
- Designed an **AI for a mobile board game** that the user can play with
- Given the current board state the AI decides on the next optimal move and **responds in less than 50ms**
- Designed a **REST API** to support the web version of the game

TECHNICAL DETAILS

Languages*: Familiar with C/C++, Python, JavaScript, SQL, HTML, CSS*
Softwares and Platforms*: Used MATLAB, TensorFlow, Git, Postman, Flask, Google Cloud Platform*

PROJECTS

- **Intelligent Room temperature control and monitoring System** *February 2017– May 2017*
  Tools Used: Python, SQLite, Raspberry Pi, HTML5, JQuery, Bootstrap, Flask
  – This system **learns the user preferences**, using a **neural network** and then predicts the **optimal temperature**
  – The user can change the preferences and **monitor the system statistics using a website** from any location

- **Tamil Handwritten Character Recognition** *February 2017– May 2017*
  Tools Used: Python, TensorFlow, JQuery, Bootstrap, Flask
  – An **interactive website** wherein the user can write characters of the Tamil language.
  – The website gives the **recognition probabilities** based on the character they have written using **convolutional neural networks**
  – The website can also be used to **gather more training data** from people who know the language

- **A game theoretical approach to solve Network Congestion** *July 2016 – November 2016*
  Tools Used: C++, NS2
  – A game theoretical approach is proposed to **resolve network congestion among competing flows**

- An **optimal and fixed congestion window size** is allocated to each node in the network at the end of the game

- **Modified GPS Navigation system** *September 2015 – November 2015*
  Tools Used: C++
  - **Total travelling time** is also taken into account in predicting the shortest path using Dijkstra's algorithm. This would help to prevent traffic congestions.

ACHIEVEMENTS AND AWARDS

- Won the **second prize in the Open house competition** conducted by the **Computer Science and engineering department** for a project
- **School First** in class X and XII board examinations

POSITIONS OF RESPONSIBILITY

- **The head of the Dramatics club script team**
- **Head of the cinematography team** of the college MOOC initiative

LANGUAGES KNOWN

- **English**
- **Tamil**
- **Malayalam**
- **Kannada**

OTHER INTERESTS

- **Film Making**
- **Magic**
- **Video Editing and VFX**
